

THE OY WINGS APPS

Your flight school, on every screen.

Native apps for iPhone, iPad, Mac, Apple Watch and Apple TV, built around the way a flight school really works.

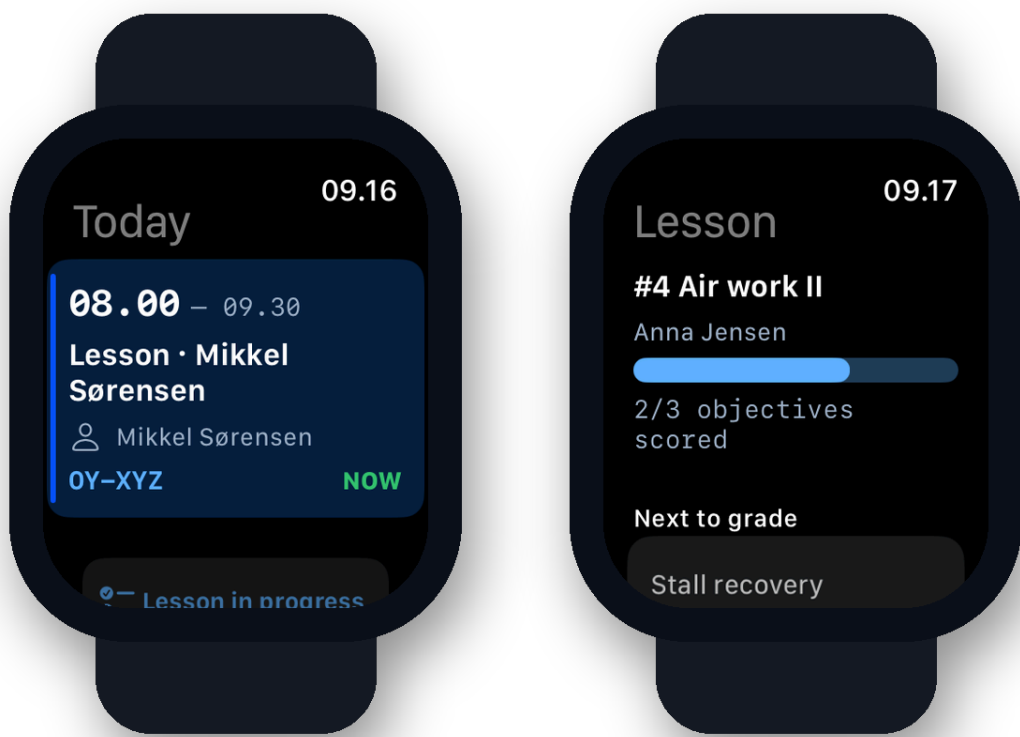

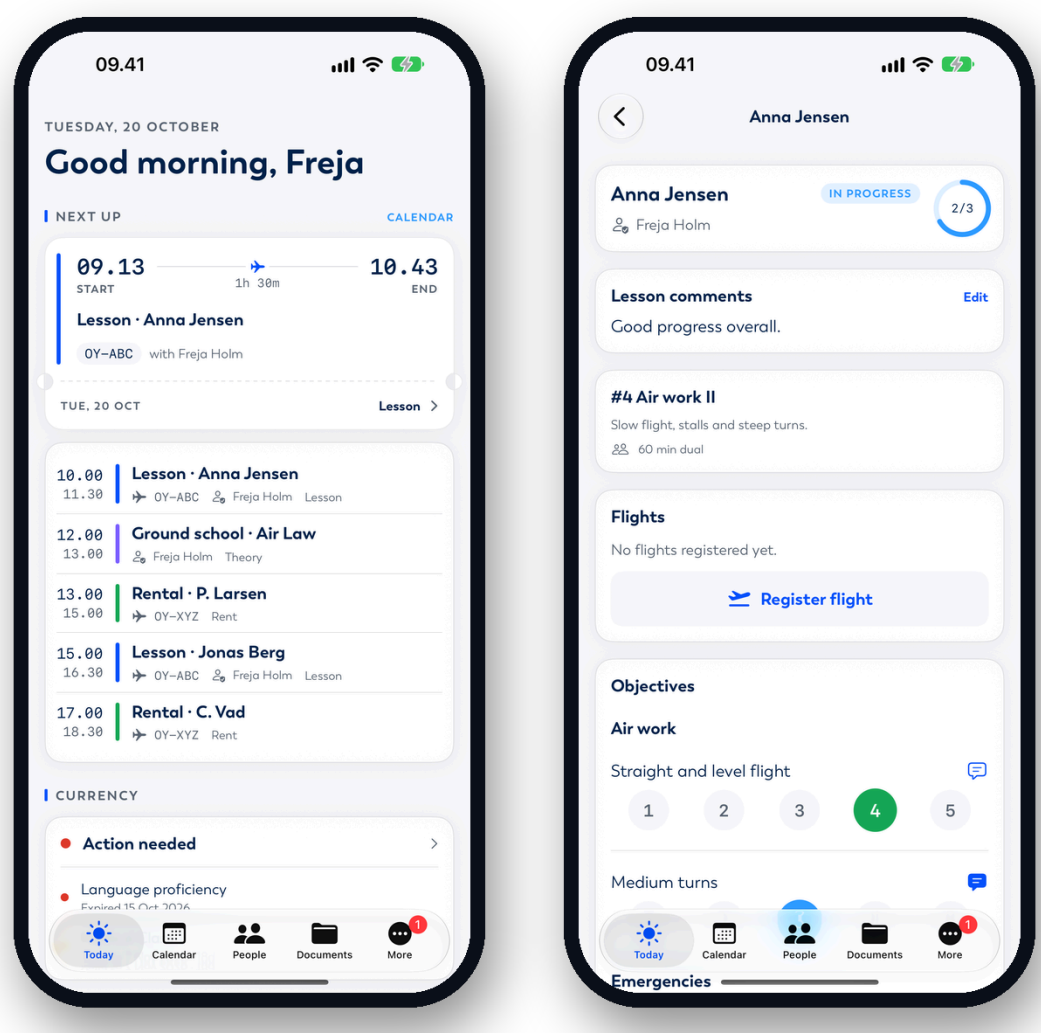

20/10/26. Oscar Yankee today announced native OY Wings apps for iPhone, iPad, Mac, Apple Watch and Apple TV. Instructors, students and operations staff now have the schedule, their lessons and the fleet with them, from the apron to the crew room.

01 · IPHONE

Your day at the airfield.

What's next, the booking and its pre-flight brief, scoring the lesson and live traffic on the map, in your pocket.

02 · APPLE WATCH

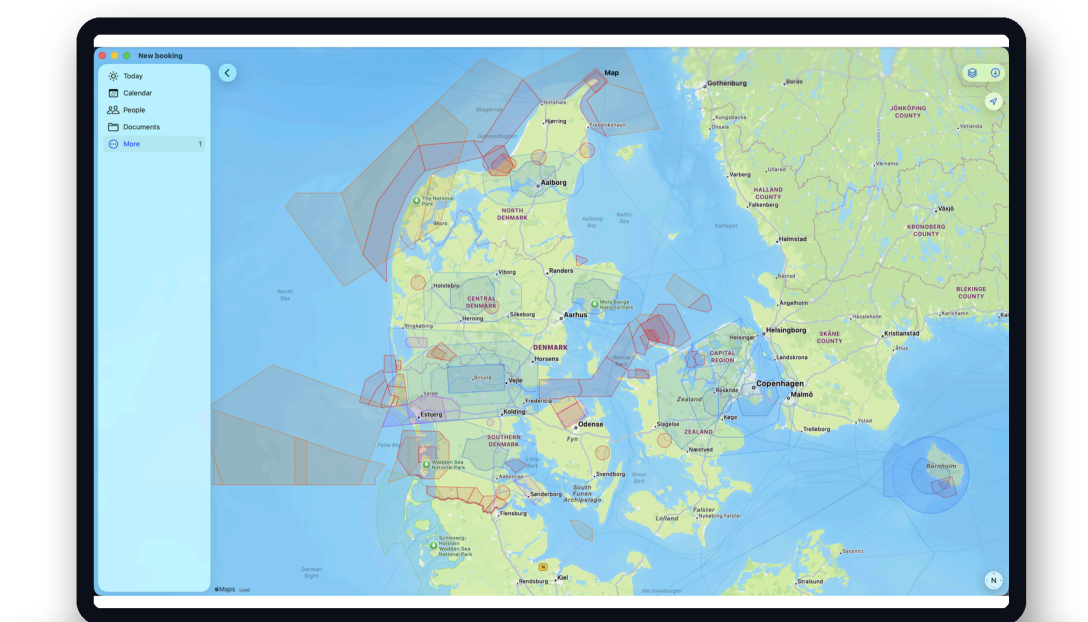

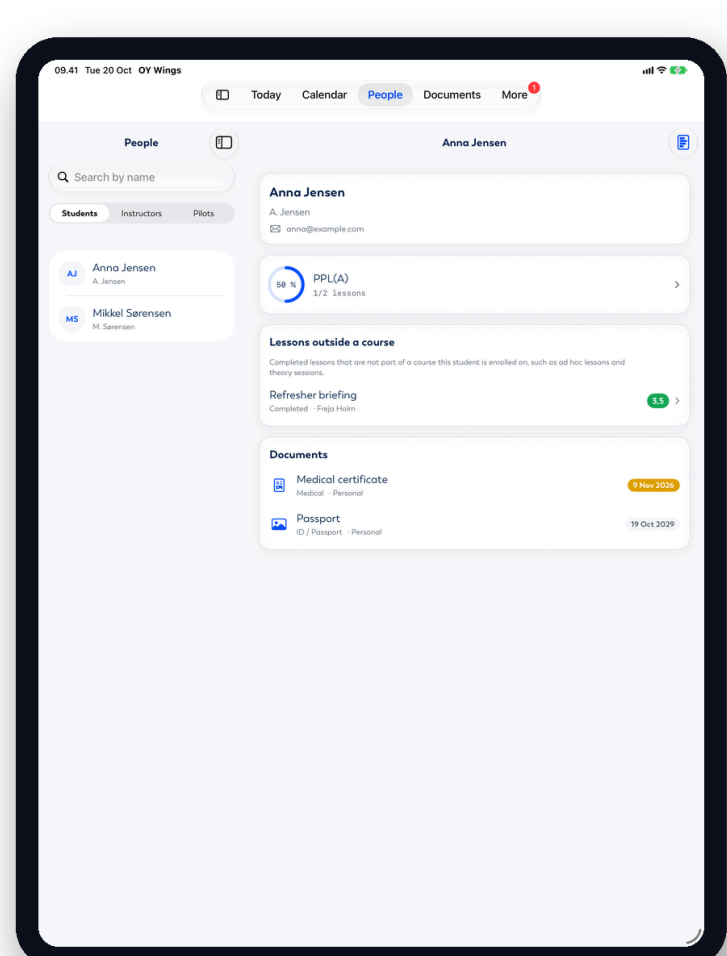

The next lesson, on your wrist.

Your next lesson and aircraft, and how the lesson in progress is going, at a glance.

03 · IPAD

The briefing room, on one screen.

Every student's progress and the lesson being graded, with room to talk it through.

04 · MAC

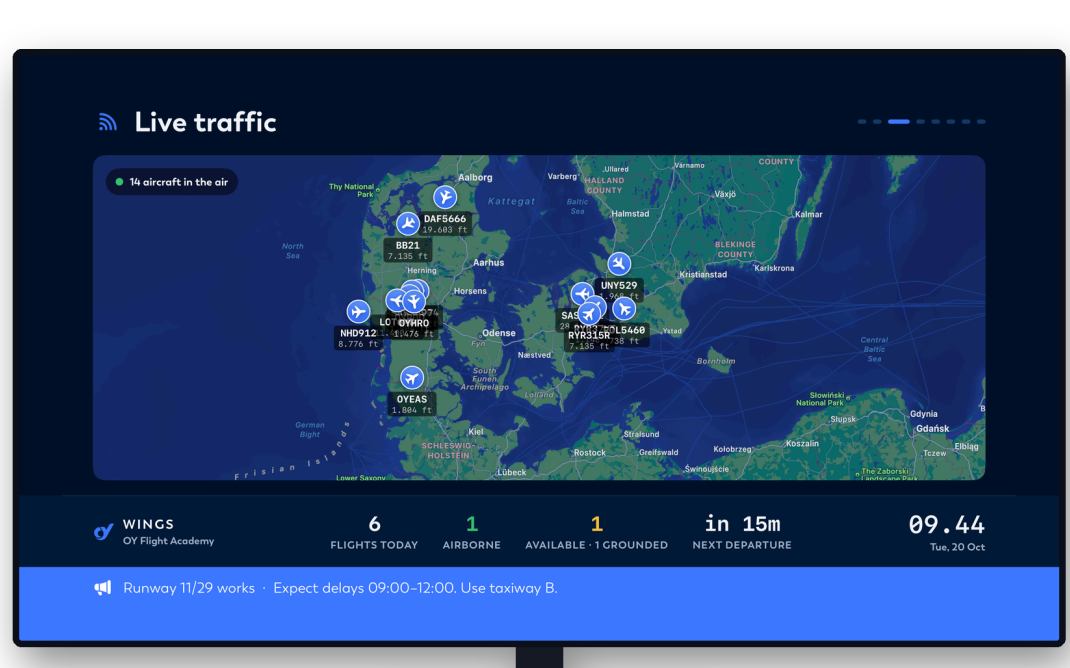

The whole operation from the desk.

The full app on the Mac, with airspace and live traffic on the big screen and the space to plan the week.

05 · APPLE TV

A live board for the crew room.

Departures, fleet status, live traffic, weather, milestones and safety, rotating on the crew room screen.
